

## CHAMELEON Covers

Chameleon covers can be used interchangeably with standard sewage treatment plant covers. Thanks to a specially adapted recess, they allow you to adapt the appearance of the cover to the environment, e.g. grass, stones, gravel, etc. When laying grass on the CHAMELEON cover, pay attention to the need for more frequent watering.

### Basic parameters

Index	Name
OD/0051	Chameleon cover 400
OD/0050	Chameleon cover 600
