

## GREEN SHOWER sprinklers

GREEN SHOWER sprinklers can be used in both surface and subsurface installations, for infiltration of treated sewage or water.

Sprinklers are produced in two versions:

- for use in the construction of linear irrigation systems
- for use in the construction of plant plots

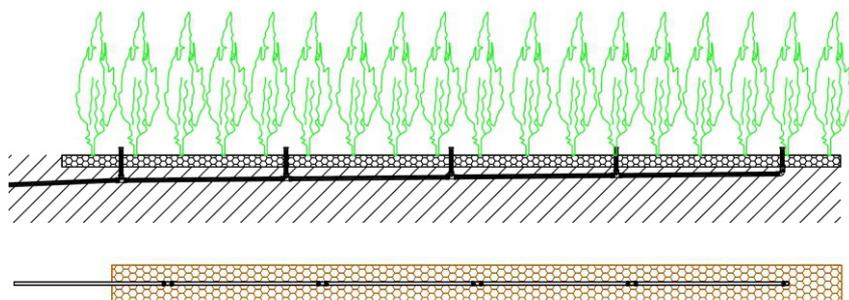

GREEN SHOWER sprinkler  
for the construction of linear irrigation systems

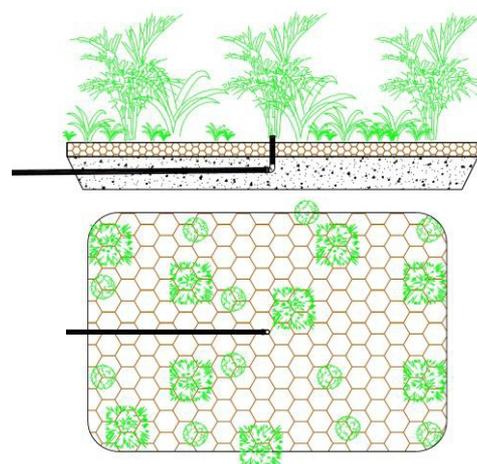

GREEN SHOWER sprinkler  
for the construction of plant plots

### Series

Index	Model	DN
A/0221	GREEN SHOWER for linear irrigation	φ 50
A/0220	GREEN SHOWER for the construction of plant plots	φ 50
